SUMMARY

I am looking forward to working in a challenging environment where I can apply my analytical skills, adapt to new tools and data systems, and continue learning. I am eager to contribute meaningfully to data-driven decision-making and deliver high-quality insights.

WORK EXPERIENCE

Data Analyst, Intangles Lab Pvt. Ltd. – Pune, Maharashtra

May 2024 - Present

RNA - ANALYTICS Team

AI-powered fleet management and predictive maintenance solutions provider

- Developed and automated over 90% of RNA's Python scripts for large-scale data processing, reporting, and predictive diagnostics.
- Owned and managed the complete DTC metadata pipeline, including enrichment, subsystem mapping, and manufacturer-specific standardization to support accurate fault interpretation.
- Performed model fitting for air intake diagnostics and evaluated algorithm accuracy for battery voltage, fuel level, coolant temperature, fuel trim, and fuel rail pressure using real-world benchmarking tools.
- Collaborated with cross-functional teams and utilized Python, R, SQL, and MLOps frameworks to deliver AI-driven solutions, firmware validation, and improved fleet performance through real-time monitoring.

EDUCATION

BE Automobile Engineering

2021- 2024

SNS COLLEGE OF TECHNOLOGY, Coimbatore

CGPA - 9.2

Diploma in automobile engineering

2018 - 2021

SUGUNA POLYTECHNIC COLLEGE, Coimbatore

CGPA - 9.1

SSLC

2017 - 2018

PSG SARVAJANA HIGHER SECONDARY SCHOOL, Coimbatore

CGPA - 7.7

TECHINICAL SKILLS

- **Programming:** Python (Advanced), R, SQL
- **Data Science:** Predictive modeling, data cleaning, validation, algorithm accuracy, big data handling
- **ML & AI:** Supervised/unsupervised learning, deep learning, AI-based maintenance, MLOps
- **Automotive Domain:** DTCs, telematics, firmware validation, fleet systems, vehicle specs
- **Tools:** Jupyter, VS Code, PyCharm, Git, Docker, Postman, Excel (Advanced)
- **Visualization:** Matplotlib, Seaborn, Plotly

PROJECTS

- **SEVC 2022:** Built an award-winning cost-efficient electric vehicle.
- **Auto Braking System:** Designed safety braking for four-wheelers.
- **Drowsiness Detection:** Developed system to stop vehicles if driver faints.
- **Movie Recommendation System:** Built a system using collaborative filtering to suggest movies.
- **AI-Assisted Oil Monitoring:** Predicted engine oil health for maintenance alerts.
